SUMMARY:

Being a junior Front-End Developer I have developed some dynamic projects where I used currently popular library like React JS and framework like Node js with Mongodb as database. I want to explore more with these technologies in future.

SKILL SETS:

Languages: HTML, CSS , JAVASCRIPT

Libraries: React, jQuery, Redux

Frameworks : Node js , Express js, Next js, React native

Database and other tools: MongoDB, Firebase, Sql

PROJECTS:

Recently Done project – 1:

Name: Bicycle manufacturer tools supplier

Features this application belongs:

- Home page including dynamic data connection with database
- User management system and payment system implementation
- Uses of Tailwind css, useForm and useQuery hooks, daisy UI
- Firebase authentication and Mongodb storage
- Stripe for payment

Special note- Please check if admin access works

Admin User: khaled@gmail.com and admin password: 111111
