## Front-end Developer (React JS & Node JS)

**SUMMARY:**

Being as a junior "Front-End Developer" I have developed some dynamic projects where I used currently popular library like React JS and JavaScript runtime like Node JS with MongoDB data storage. I want to explore more with these technologies in future. I find myself as a team-oriented programmer and inspired also to lead small or medium scale projects independently. My future goal is to be skilled on Block-chain technology and implement it in real life projects.

**SKILL SETS:**

| | |
|---|---|
| **Languages**: | HTML, CSS , JavaScript, GraphQL, |
| **Libraries**: | React JS, jQuery, Redux |
| **Frameworks** : | Express JS, Next JS, React native |
| **Database and other tools**: | MongoDB, Firebase, Node JS , Sql, Github, |

✓ **Portfolio Site**: ⊕ **Live site link**

## PROJECTS  :

### *Recently Done project* – (1): Name: Bicycle manufacturer tools supplier

**Features this application belongs:**
- Home page including dynamic data connection with database
- User management system and payment system implementation (Stripe)
- Tailwind CSS, useForm and useQuery hooks, daisy UI, google authentication
- Firebase / Mongodb storage

**Special note**- To check (Admin User: khaled@gmail.com and admin password: 111111)

➢ **All Links** ⊕ **Live site**          **Client site(Github)**          **Server site(Github)**

### *Recently Done project* – (2): Name : Books store and warehouse

**Features this application belongs:**
- Usage of React JS, Node JS, express server, MongoDB, Tailwindcss, Firebase,

**All Links to visit:**

➢ **All Links** ⊕ **Live site**          **Client site (Github)**          **Server site (Github)**

### *Recently Done project* – (3): Name: Todo List with Redux toolkit and react JS

**Features this application belongs:**
- ❖ React JS, Redux toolkit, Tailwind css, Daisy UI
- ❖ Add Todos, Edit Todos, Delete Todos and Sort tasks on status (completed/not completed) etc.

➢ **All Links** ⊕ **Live site**          **Client site (Github)**

### *Recently Done project* – (4): Name: Todo List with GraphQL and React JS

**Features this application belongs:**
- ❖ React JS, GraphQL, Tailwind css, Daisy UI
- ❖ Add Todos, Edit Todos, Delete Todos

**Note: Login and About page are under construction**

➢ **All Links** ⊕ **Live site**          **Client site (Github)**          **Server site (Github)**
